

Prepared for Codex User

test test test !!!

Executive Summary

Hello Codex User, this sample shows how WeasyPrint handles multi-page reports using Jinja templates. The first page includes a summary table and overview paragraphs. CSS rules control pagination so that logical sections stay intact, while long content naturally flows onto the next page.

The layout uses page-break hints to keep the summary together and forces the appendix to begin on a fresh page. Feel free to copy this structure when you need deterministic pagination in your own PDFs.

Task	Hours	Rate	Total
Feature work	3.00	\$120.00	\$360.00
Debugging	1.50	\$140.00	\$210.00
Grand total			\$0.00

Additional narrative content ensures the first page is filled with realistic text. Below you will find repeated paragraphs to guarantee the document spills over to a second page when rendered at A4 size with standard margins.

Paragraph 1: Continuous improvement remains our guiding principle. We document each iteration carefully, capture lessons learned, and share the findings with stakeholders so decisions stay transparent and defensible.

Paragraph 2: Continuous improvement remains our guiding principle. We document each iteration carefully, capture lessons learned, and share the findings with stakeholders so decisions stay transparent and defensible.

Paragraph 3: Continuous improvement remains our guiding principle. We document each iteration carefully, capture lessons learned, and share the findings with stakeholders so decisions stay transparent and defensible.

Paragraph 4: Continuous improvement remains our guiding principle. We document each iteration carefully, capture lessons learned, and share the findings with stakeholders so decisions stay transparent and defensible.

Appendix: Detailed Notes

This section is forced onto a new page using the .break-before rule. Long unordered lists, tables, or textual digests can live here without disturbing the layout of prior sections.

- Reference note 1 – summarize supporting detail, attach evidence, or record assumptions.
- Reference note 2 – summarize supporting detail, attach evidence, or record assumptions.
- Reference note 3 – summarize supporting detail, attach evidence, or record assumptions.
- Reference note 4 – summarize supporting detail, attach evidence, or record assumptions.
- Reference note 5 – summarize supporting detail, attach evidence, or record assumptions.
- Reference note 6 – summarize supporting detail, attach evidence, or record assumptions.
- Reference note 7 – summarize supporting detail, attach evidence, or record assumptions.
- Reference note 8 – summarize supporting detail, attach evidence, or record assumptions.
- Reference note 9 – summarize supporting detail, attach evidence, or record assumptions.
- Reference note 10 – summarize supporting detail, attach evidence, or record assumptions.
- Reference note 11 – summarize supporting detail, attach evidence, or record assumptions.
- Reference note 12 – summarize supporting detail, attach evidence, or record assumptions.
- Reference note 13 – summarize supporting detail, attach evidence, or record assumptions.
- Reference note 14 – summarize supporting detail, attach evidence, or record assumptions.
- Reference note 15 – summarize supporting detail, attach evidence, or record assumptions.
- Reference note 16 – summarize supporting detail, attach evidence, or record assumptions.
- Reference note 17 – summarize supporting detail, attach evidence, or record assumptions.
- Reference note 18 – summarize supporting detail, attach evidence, or record assumptions.
- Reference note 19 – summarize supporting detail, attach evidence, or record assumptions.
- Reference note 20 – summarize supporting detail, attach evidence, or record assumptions.

Add more structured content as needed. You can also insert charts or images; WeasyPrint will respect the same page-break constraints described above.

Generated with Jinja + WeasyPrint pagination demo.
